#### **§ 1124.13 Producer milk.**

*Producer milk* means the skim milk and butterfat in milk of a producer that is:

(a) Received or diverted by a handler defined in § 1124.9(a) under one of the following conditions:

(1) Received at such handler's pool plant directly from the farm of such producer;

(2) Received at such handler's plant from a handler defined in § 1124.9(c) for all purposes other than those specified in paragraph (b)(2)(i) of this section; and

(3) Diverted for the account of the operator of the pool plant, subject to the conditions set forth in paragraph (c) of this section.

(b) Received or diverted by a cooperative defined in § 1124.9 (b) or (c) under one of the following conditions:

(1) Milk diverted for the account of the cooperative association. Except for milk moved by a cooperative reserve supply unit defined in § 1124.11, such diversions shall be subject to the condi-

tions set forth in paragraph (c) of this section;

(2) Milk for which the cooperative association is a handler pursuant to § 1124.9(c) to the following extent:

(i) For purposes of reporting pursuant to §§ 1124.30(c) and 1124.31(a) and making payments to producers pursuant to § 1124.73(a); and

(ii) For all purposes, with respect to any such milk which is not delivered to the pool plant of another handler.

(c) The following conditions shall apply to diverted producer milk:

(1) A cooperative association or its agent may divert for its account the milk of any producer. The total quantity of milk diverted may not exceed 80 percent during the months of September through April of the total quantity of producer milk which the association or its agent causes to be delivered to pool distributing plants or diverted. No percentage limit shall apply during the months of May through August. The percentage limits on diversions specified in this paragraph shall not apply to a cooperative reserve supply unit defined in § 1124.11;

(2) A handler other than a cooperative association that operates a pool plant may divert milk for its account to other plants or pursuant to § 1124.40(b)(3). The total quantity of milk so diverted may not exceed 80 percent during the months of September through April of the milk received at such handler's pool plant or diverted by such handler from any producer other than a member of a cooperative association which markets milk under paragraph (c)(1) of this section and for which the operator of such plant is the handler during the month. No percentage limit shall apply during the months of May through August;

(3) Milk diverted in excess of the limits specified shall not be considered producer milk, except for milk diverted by a cooperative reserve supply unit. The diverting handler shall specify the producers whose milk is ineligible as producer milk. If a handler fails to designate such producers, producer milk status shall be forfeited with respect to all milk diverted by the handler during the month;

(4) Two or more cooperative associations may have their allowable diversions computed on the basis of their combined deliveries of producer milk which the associations cause to be delivered to pool plants or diverted during the month if each association has filed a request in writing with the market administrator on or before the first day of the month the agreement is to be effective. This request shall specify the basis for assigning overdiverted milk to the producer deliveries of each cooperative according to a method approved by the market administrator;

(5) Diverted milk shall be priced at the location of the plant or commercial food processing establishment to which diverted; and

(d) In the case of any bulk tank load of milk originating at farms and subsequently divided among plants, the proportion of the load received at each plant shall be prorated among the individual producers involved on the basis of their respective percentage of the total load.
